THREE SAVES IN MAY!

Statistics show that 80% of mothers who see their unborn child on ultrasound will **CHOOSE LIFE**. We praise God that in the month of May, 100% of the three clients who received an ultrasound **CHOSE LIFE!**

We are thankful first and foremost to God, Creator of life, for His work in softening their hearts. Secondly, we thank you who pray for our clients and our ministry. Thirdly, to those of you who are able to give to support our ministry, we thank you.

These three saves would not be possible without all three of those things simultaneously happening!

AN ANSWER TO YOUR PRAYERS

Our Clinical Director was able to present our services to a meeting of all Kanawha County school nurses and share how we can help pregnant teens and young moms in our area. School nurses in surrounding counties, along with the Fellowship of Christian Athletes, which works with teens in the local schools, have also been contacted and given information on the services we provide.

Please pray that our information will be relayed to the students when there is a need!

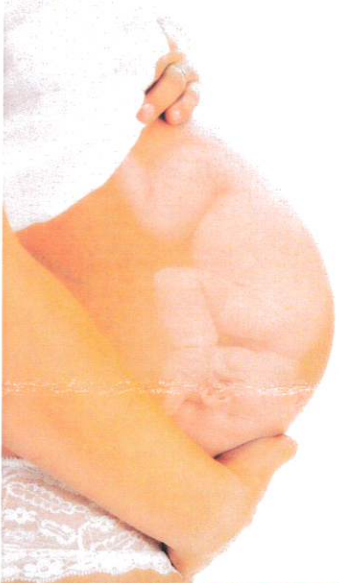

A SUCCESS

THANKS TO YOU!

Thank you to everyone who attended or helped promote our "Pasta with a Purpose" Spaghetti Dinner! We feel the love and support and so appreciate your generosity! Approximately 175 guests were served and \$4,000 raised to continue God's work at Woman's Choice. Thank you also to all the volunteers for giving your time and energy to make this event possible!

Which one would you choose?

YOU ASKED & WE LISTENED

We so appreciate our supporters who take the time to mail in checks or drop off cash donations! Some have asked for an easier way to contribute using other sources. Good news! We now have online giving available through Anedot. Check it out using the QR code or the URL below:

OUTREACH OPPORTUNITIES

Both of our nurses represented Woman's Choice at the WV State University Health Fair.

Many curious students (pro-life & pro-choice) were engaged with our literature, information, and fetal models, leading to meaningful and informative conversations.

We are actively seeking more community events to attend. Please contact us if you have any leads:

Which One Would You Choose?

Scenario #1 - A mother is pushing a stroller with her newborn and holding her toddler's hand as they walk down the sidewalk of a busy street in Charleston. Unexpectedly, the toddler pulls her hand loose and darts into the path of oncoming traffic. As you are attempting to cross the street you notice the little girl is in grave danger, instinctively, you (to be continued)

Scenario #2 - A mother has just found out that she has an unplanned and unwanted pregnancy. She is in an unstable relationship and the father of her child offers her no support and insists she have an abortion. In fact, everyone she knows is attempting to influence her to decide to end her child's life. The mother already has one child and has minimal financial resources to support another. She really doesn't want an abortion but sees no other way out of this situation. While she contemplates her decision, her baby is also in grave danger.

Thankfully, scenario #1 would most likely be a rarity but if you were faced with this situation you would instinctively dart into the street, pick up the little girl and run to safety. God would lead you to sacrifice your safety to save one of His creation. In addition to the mother's gratitude, God would place that warm feeling in your heart, knowing you followed His leading. Through your obedience, He saved the child and prevented a lifetime of sadness for that mother.

Unfortunately, scenario #2 involving an abortion occurs about every 1.5 minutes in our country. Mothers are faced with life and death decisions. There is little to deter them from choosing abortion except for the influence of those who believe in the truths of scripture, **that every life is sacred to God.**

Which child would you choose to save if you were put in a position of choice? We know you would emphatically say #1 but we believe you would choose to save both. You would save #2 by directly assisting a mother in need of support or by helping a local pro-life organization who has the God given gifts and experience to meet her needs.

The result of saving a child from either scenario is the same. This child will be allowed to experience the warmth of the sun, the coolness of a spring breeze and possibly now and then their favorite ice cream cone. A mother will be spared a lifetime of sadness and regret. You will receive the joy and blessing of knowing you answered God's call to make a difference in lives.

Through your answered prayers and the use of ultrasound during the month of May, we were blessed to see God save three of these innocent babies lives and their mothers. The staff at our center was merely the conduit He used. He didn't need us but we needed Him. We needed to feel the joy and blessing of obedience that only He can provide. We are blessed to know that this is also your desire as we partner and labor
