What a Great Day!

What a day we live in to be a Christian! Surveys say that one third of people believe the world will end in their lifetime (<https://psycnet.apa.org/record/2027-36275-001?doi=1>). That means there is a lot of anxiety about the future, and this gives us ample opportunity to share why we have good reasons to have hope in the future. I have a new talk called Sharing Christ in a Pagan Culture which highlights different approaches for different people.

Many are so convinced that their thinking is right, they won't even listen to the Word of God. That is where this new book on apologetics comes in handy. *Defending God's Existence* shows how to gently put cracks in their faulty belief system and explain that their worldview must borrow from the Christian worldview to make sense of the world. The goal is to put some cracks in their shield of disbelief so they are more open to listen to the Word of God. We then rely on the Holy Spirit to take the Word and penetrate those cracks and bring them to saving faith.

I presented 2 pertinent talks at the Ministries Conference in Grand Rapids a couple weeks ago. There are powerful influences in that area (i.e., Biologos) that are dedicated to mixing the mainstream atheistic belief with the Bible. So many are hearing that we can't trust what God actually said. I came across a number of people who expressed interest in having me at their church.

The majority of churches in America are going the wrong way. That is why I am still passionate about traveling and sharing the true history of the world starting with Genesis 1:1. You are a big part of what we do. Thanks so much for your prayers and support.

It is always encouraging to know that the things you do are having an impact on people's lives. In this Facebook reel (<https://www.facebook.com/share/r/184mNCNAPJ/?mibextid=wwXlfr>), Gabrielle Terry understood what I meant in a blog (<https://www.rforh.com/blog/2022/03/04/loose-the-lion>) that the Bible has changed the world in the past, and it has the power to do it again. We just need more bold people like the reformers (Charlie Kirks) who risked their lives to stand for the truth.
